BILL NO. S-83-05-16

SPECIAL ORDINANCE NO. S-113-83

AN ORDINANCE approving Civil City Purchase Order #A-26255 by the City of Fort Wayne by and through its Department of Purchasing with Indiana Fire Prevention Company for the Fire Department.

WHEREAS, according to national and local Fire Department statutes, senior citizens suffer, as a group, from fires and fire related matters more than any other group, excepting small children; and

WHEREAS, senior citizens, as a group, are very vulnerable to fire caused and/or related deaths in that many senior citizens live in older homes and/or have physical limitations limiting the ability to escape from homes; and

WHEREAS, the City, following the examples established by many other communities around this country, recognizes the need to develop programs to combat such problems; and

WHEREAS, the City is willing to make available to senior citizens smoke detectors at a nominal charge; and

WHEREAS, the purchase of the smoke detectors, as herein indicated, would allow for the purchase of smoke detectors by senior citizens of this community at a nominal and affordable cost.

NOW, THEREFORE, BE IT ORDAINED BY THE COMMON COUNCIL OF THE CITY OF FORT WAYNE, INDIANA:

SECTION 1. That Civil City Purchase Order #A-26255, between the City of Fort Wayne, by and through the Civil City Purchasing Agent, and the Department of Purchasing and the Indiana Fire Prevention Company for the Fire Department, respectfully, for:

approving the awarding of the bid with respect to the purchase of Four Thousand Five Hundred (4,500) smoke detectors for the Fire Department of the City of Fort Wayne, Indiana;

involving an approximate total cost of Thirty-Five Thousand Two Hundred Eighty and No/100 Dollars ($35,280.00), all as more particularly set forth in said Purchase Order, which is on file in the Office of the Department of Purchasing, and is by reference incorporated herein, made a part hereof, and is hereby in all things ratified, confirmed and approved.

SECTION 2. That this Ordinance shall be in full force and effect from and after its passage, and any and all necessary approval by the Mayor.

Mark E. Gaunt

CITY OF FORT WAYNE, INDIANA

REQUEST FOR BIDS

SMOKE DETECTORS

The City of Fort Wayne, Indiana, is requesting the submitting of bids for the aquisition of approximately 4,500 Smoke Detectors.

Delivery time will be an important item for evaluation. It is important to the City of Fort Wayne to have as quick a delivery as possible.

A questionnaire is attached, it is required that each bidder complete this questionnaire form. Any Vendor not completing this form may be disqualified.

The following are the minimum specifications that each Smoke Detector must meet.

SPECIFICATIONS

1. Battery Power - 9 volt (low cost), included.
2. Dual Ionization Chambers.
3. Low Battery Indicator - a device that sounds to indicate a weak battery.
4. Test Button - conveniently located on the Detector for frequent testing.
5. Installation - the unit must be easy to install, and must be able to be installed with a minimum of time and mess. Double-face tape is preferred.
6. U.L. Approved
7. Minimum of 85 Decibel Horn.
8. Solid State Circuitry.
9. Warranty - Minimum one (1) year.

ANOTHER FIRST
from the leader in home alarms!

BRK's new 79R is the first smoke detector UL listed for use with a carbon zinc battery. It has an improved dual chamber ionization sensor, a new solid-state electronic horn and a flashing LED to indicate that the battery is powering the detector. It also has a battery monitoring circuit which monitors *both* voltage and internal impedance!

Firsts have been a habit with BRK since 1969 when we produced the first battery-operated smoke detector to receive UL listing. In 1976 we became the first to protect over a million families, and by 1978 we were first to sell over 10 million smoke alarms! Now we're first again—with a technically superior detector that meets UL's new 7% smoldering smoke test and can be powered by a low cost, easily replaceable 9 volt carbon zinc battery.

The 79R's new ionization sensor was developed after two years of detailed research at BRK. It combines dual chamber design for performance stability during periods of changing humidity and atmospheric pressure with a more open design assuring good smoke entry characteristics. Detector sensitivity is pre-set and does not have to be calibrated in the field. The 79R also features an improved battery monitoring circuit. Not only will the monitoring circuit trigger a trouble beep when battery voltage is low, it will also sound a trouble signal when the battery's internal impedance reaches unacceptable levels. Tests have shown that batteries with excessive impedance will not function properly.

There is extra reassurance built into the 79R, too. Its full function test switch is complemented by a blinking LED which flashes approximately once per minute to indicate the battery is supplying power to the detector. Its highly reliable 85 dB electronic horn has a penetrating high frequency sound, and there's a special horn start-up capacitor circuit to help assure reliable operation.

Quite clearly, BRK's seventh generation ionization detector is in a class by itself!

BRK
ELECTRONICS
~First in Fire Warning®

UL LISTED

GENERAL DESCRIPTION

In 1969 BRK introduced the first battery powered ionization detector to be listed by Underwriters Laboratories. In the years since, BRK has continued to improve upon its detectors and has developed a worldwide reputation for performance and excellence.

We have now developed the 79R, a single-station ionization smoke detector, which is the first to be UL listed for use with a 9 volt carbon zinc battery, as well as the alkaline type of battery.

The 79R features a dual chamber, single-source ionization sensing mechanism. The dual chamber is highly sensitive and can detect visible and invisible products of combustion. It allows for non-electronic compensation for pressure and humidity changes and offers exceptional detection stability. The sensitivity of the 79R is pre-set and is maintained through the life of the battery, even to the point at which the trouble signal begins. even to the point at which the trouble signal begins.

Weekly testing of the 79R is easy because it has a unique test switch that electronically stimulates the sensing chamber, creates the effect of smoke, and thereby causes an alarm. This switch tests the sensitivity, circuitry, alarm horn and other detector functions. The 79R also has a special horn start-up capacitor circuit that helps assure reliable operation.

The 9 volt battery supplied with each detector is easily replaced at low cost and should last at least one year under normal use. Battery operation is supervised. When voltage drops to a pre-set warning level, the 79R's horn will give a short BEEP, indicating that it is time to insert a new battery. The warning BEEPS occur every minute or so. The detector will sound a warning if a "bad" battery (one with corroded contacts, or too much internal impedance to permit adequate current flow) is put in.

Another built-in feature of the 79R is a light-emitting diode (LED) that flashes at least once a minute to indicate that the battery is in place and the detector is receiving power.

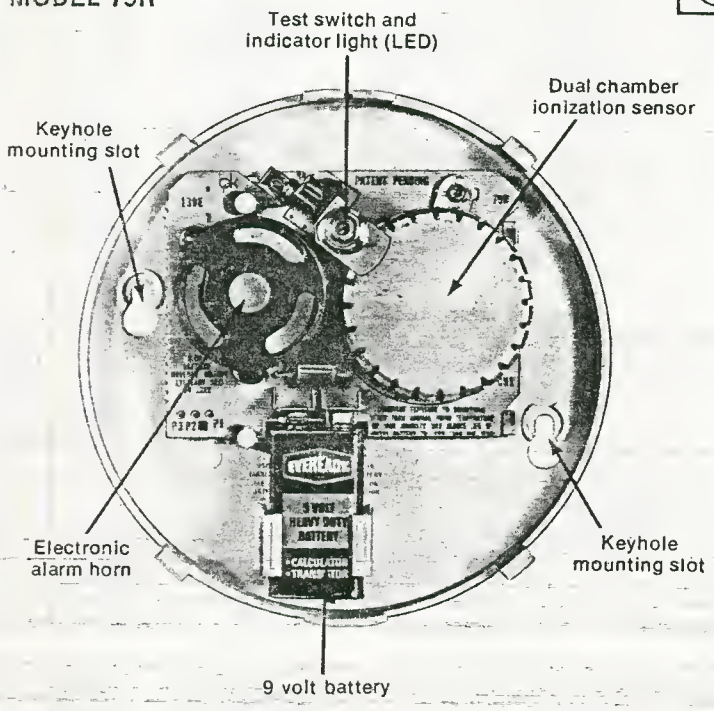
The 79R is designed for surface mounting. Screws and mounting anchors are supplied. Ideally the detector should be located on the ceiling as close to the center of the room or hallway as possible. If ceiling location is impractical, wall mounting may be used except where a local code prohibits it. Wall mounted detectors should be located at least 3 feet from any corner and 4" - 6" from the top of the ceiling.

UL LISTED

FEATURES

- Powered by a 9V carbon zinc battery built to last at least one year and so inexpensive that it can reduce battery replacement costs year after year.
- Flashing LED (light-emitting diode) provides constant reassurance that battery is properly connected and detector is receiving power.
- Dual chamber, one microcurie single-source ionization sensing mechanism.
- 85 decibel solid state electronic alarm horn.
- Can give early warning of slow, smoldering fires and precious extra seconds to escape fast-developing flaming fires.
- Built-in test switch checks sensitivity and proper operation.
- Trouble signal BEEPS for up to 30 days when battery is low and needs replacing. Also BEEPS when a "bad" battery (one with corroded contacts or too much internal impedance) is inserted.
- Special horn start-up capacitor circuit helps assure reliable operation.
- Non-electronically compensates for pressure and humidity changes.
- Pre-set sensitivity...maintained through life of battery.
- UL listed to Standard 217...meets new 7% smoldering smoke test.
- Self-resetting after smoke has cleared detection chamber.
- Easy to install, clean and maintain.

MODEL 79R



* Not included on Model 79P.

SPECIFICATIONS — Model 79R

Sensitivity	Meets requirements of UL Standard 217.
Detection	Dual ionization chamber.
Source	Not more than 1 Microcurie of AM 241.
Alarm Duration	15 hours continuous with a fresh battery, five hours with a battery that just starts giving a low battery indication.
Test Switch	Electronically stimulates chamber to simulate smoke.
Alarm Circuit	100% solid state.
Battery	Supplied with 9V carbon zinc battery
Battery Life	1 year minimum.
Low Battery Indication	30 days minimum.
Alarm Horn	Solid State Electronic.
Horn Level	85 decibels at 10 feet.
* Indicator Lamp	Solid State LED (light-emitting diode) flashes at least once a minute to indicate unit is receiving power.
Weight	8 oz.
Temperature Range	40° to 100° F.
Humidity Range	10% to 85% relative humidity.

DIGEST SHEET

S-83-05-16

TITLE OF ORDINANCE Special Ordinance

DEPARTMENT REQUESTING ORDINANCE Purchasing

SYNOPSIS OF ORDINANCE An Ordinance approving the awarding of the bid with respect to the purchase of smoke detectors for the Fire Department of the City of Fort Wayne, Indiana.

EFFECT OF PASSAGE The purchase of said smoke detectors will enable the Fire Department to distribute them to senior citizens (for a nominal charge).

EFFECT OF NON-PASSAGE Smoke detectors will not be purchased.

MONEY INVOLVED (Direct Costs, Expenditures, Savings) Indiana Fire Prevention - approximately $35,280.00 ($7.84 each)

ASSIGNED TO COMMITTEE (President)
